PicoTeam

DIGITAL
CAGE CARDS
SOLUTION

3 Steps Process

1 **Animal Data**
The cards system software receives animal data from your animal management system or other structured data sources, e.g. Excel

2 **Gateway System**
The system layouts the relevant information in the chosen card design template and sends the cards image to the cage card gateway

3 **Digital Cage Cards**
Gateway system software updates cage cards and information is displayed without requiring any power to retain image

Mobile App

The PicoTeam Mobile App can function independently as a standalone tool or as a valuable extension to the Digital Cage Cards, enhancing their capabilities. Users can scan a QR code or use NFC to read the built-in RFID on the Digital Cage Card, instantly accessing detailed information about animal cages and their inhabitants
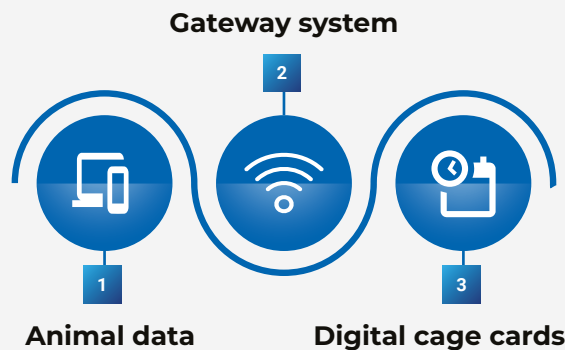

- ✓ **Accessibility:** information on-the-go
- ✓ **Efficiency:** streamlines data management
- ✓ **Data Accuracy:** ensures error-free records
- ✓ **Communication:** enables team collaboration
- ✓ **Animal Welfare:** enhances care management
- ✓ **Real-Time Monitoring:** provides instant access

BECOME OUR AWESOME CUSTOMER TODAY

About Solution

An innovative digital cage cards solution designed to replace traditional paper cage cards, thereby transforming the operational dynamics of animal facilities. The solution incorporates Digital Cage Cards and their integration with animal data from animal management systems (AMS) or other structured sources such as Excel. Supported by a versatile Mobile App
