

OUR SERVICES

We are done - when you are happy

- 1** | Digitalization Consultancy - Partner with us to integrate hardware and software into comprehensive end-to-end solutions
- 2** | Custom Software Development - Harness our expertise to create custom software and apps that meet your unique needs
- 3** | Data Science - Let our experts assist you in structuring, managing and extracting insights from your data
- 4** | Innovation - Collaborate with us to access our software and hardware solutions that will enhance your in vivo studies

INVIVO LAB DIGITALIZATION

WE CAN HELP YOU!

ABOUT US

PicoTeam has been innovating in the digitalization of complex workflows for numerous years. In collaboration with top life-science companies, we've developed solutions that streamline the planning, execution, and reporting of in vivo research studies, while also ensuring that data is properly tagged and organized for future analysis and reuse

Our team is skilled in both the granular aspects and comprehensive strategies of in vivo research, providing the expertise necessary to successfully digitize your in vivo research processes

HOW CAN WE HELP?

Invivo lab digitalization

At PicoTeam, we enable your teams to focus on the animals, the research, and the outcomes by facilitating and enhancing digitalization and integration within your laboratories

INNOVATION

In close collaboration, we facilitate the introduction of digital innovation into your animal research workflow

DIGITALIZATION

Streamline workflows and make the right information available where it's needed

INTEGRATION

Integrate instruments and existing systems into a cohesive, easy-to-use workflow

DATA

Facilitating easy data capture during research will result in higher quality data

FULL CIRCLE

End-to-end digitalization

For digitalization to succeed, every user's workflow have to be considered in the solutions.

Collaborating with lab technicians, animal caretakers, veterinarians, and scientists, we can help connect the ends and create full circle solutions

GET A HEAD START

With PicoTeam as your partner

Our library of digitalization modules is designed to jump-start your custom solutions. By integrating our adaptable modules with your current software and instruments, we provide an efficient combination of reuse and build solutions catered to your unique requirements
